

KAZIM TULUK

Business Data Analyst

Kingston, ON · +1 647-760-4817 · kazim.tuluk@gmail.com · kazimtuluk.github.io · promathai.com · [LinkedIn](#)

PROFESSIONAL SUMMARY

- Business Analyst grounded in formal Business Analytics training and 14 years inside education institutions, bringing first-hand knowledge of student data, assessment workflows, and the needs of students, parents, teachers, and school leadership
- Designed, built, and deployed a production student learning platform end to end (**promathai.com**): translated user needs into functional requirements, configured integrations with multiple third-party systems, and administered role-based user access
- Recognized by placement supervisors for an outstanding ability to listen, clarify requirements, and return relevant analytics and visuals that accelerated product development objectives
- Applies statistical analysis in Python, R, and SQL (regression, ANOVA) to assessment and survey data, and builds reproducible reporting workflows in Excel and Power BI
- Translates complex, technical results into clear documentation, training materials, and presentations adapted to technical and non-technical audiences

CORE COMPETENCIES

Business Analysis: Requirements gathering & translation · business process mapping & improvement · root cause analysis · test scenario design · end-user documentation & training · risk assessment · backlog prioritization

Data & Reporting: SQL (PostgreSQL, MySQL) · Python (pandas, numpy) · R (tidyverse, psych) · Excel (advanced formulas, pivots) · Power BI · Tableau · regression, ANOVA

Systems & Integration: System configuration · third-party system integrations (REST APIs) · user access administration · data input process design · CI/CD workflows (GitHub) · AI/LLM application design

Professional: Stakeholder communication · adapting messages to different audiences · relationship building · presentation & storytelling · accountability · lifelong learner

PROFESSIONAL EXPERIENCE

Founder & Business Analyst · ProMathAI (promathai.com) · Kingston, ON

2025 – Present

AI-powered exam-preparation platform for Grade 8 mathematics students, offering step-by-step AI explanations, adaptive question generation, and topic mastery tracking; live in production since May 2026.

- Translated a recurring classroom problem, students receiving no timely feedback on practice tests, into functional requirements and an implementation plan
- Configured and maintains integrations with third-party services: managed PostgreSQL, cloud object storage/CDN, AI API, transactional email, and hosting pipelines
- Documented system architecture, deployment workflows, and design decisions in a technical report
- Administers user access: role-based student and teacher accounts, code-based registration, and a secure password-reset workflow
- Designed data input processes for a 1252-item question bank and teacher-uploaded content
- Created and executed multi-level test scenarios (API validation, cross-device and cross-browser testing) before each release
- Performed root cause analysis on production issues and resolved them through a prioritized, risk- and effort-rated backlog

Data & AI Analyst (Placement) · Stature Leadership · Kingston, ON

2025

- Developed an AI-powered reporting agent that analyzes leadership survey data and leverages the company's knowledge base to generate tailored coaching reports
- Analyzed leadership assessment data across three capability pillars using repeated-measures ANOVA and follow-up tests to identify systematically weaker capabilities
- Ran linear regression linking overall leadership scores with organizational characteristics, finding a strong negative relationship between retention challenges and leadership scores
- Designed a user-friendly interface that lets coaches interact with the AI, refine report content, and add contextual insights, giving coaches full control of reports and greater client impact in less session time
- Built the end-to-end automation flow, from ingesting survey responses through generating reports to emailing finalized documents, reducing manual workload and turnaround time

Mathematics Teacher & Head of Math Department · EU Schools · Istanbul, Türkiye	2010 – 2024
• Led assessment planning across a six-teacher department, aligning curriculum delivery and exam expectations across classes • Designed and implemented a two-stage peer review process for exam questions, pairing teachers to check items both before and after writing, catching errors before they reached graphic production • Analyzed practice-exam results to identify learning gaps and their root causes, redirecting instruction and study plans toward the highest-impact skills • Designed and led a structured parent-communication and joint student-monitoring process for underperforming students, improving exam outcomes and strengthening student–teacher–parent engagement • Developed training materials, assessments, and step-by-step guidance adapted to audiences ranging from students and parents to school leadership	

EDUCATION

Graduate Certificate, Business Analytics · St. Lawrence College · Kingston, ON	2025
Integrated BSc & MSc, Mathematics Education · Boğaziçi University · Istanbul, Türkiye	2010

CERTIFICATIONS & TRAINING

• Deploying AI · Data Science Institute, University of Toronto (2026): AI system & application design, implementation and deployment, model adaptation, evaluation & monitoring, performance/latency/cost optimization • Microsoft Azure Data Scientist Associate · Microsoft on Coursera (in progress) • Python for Data Analysis · Learning Excel: Data Analysis (LinkedIn Learning) · Introduction to Statistics in R (DataCamp) · Statistics for Business Analytics and Data Science (Udemy)
